

OASBO January Hot Topics 2022-2023

Course Description Quick Guide

Course Name	Course Description
<p>Cyber Security - Protecting Your District Assets</p> <p>Tom Munson, Sr. Account Executive , DataServ, Brent Ramdin, CEO, DataServ</p>	<p>This course will cover an overview of the multiple areas of cybersecurity required to insure overall protection of student and staff data. It will also review the cybersecurity basic essentials that districts can control and should be implemented as a standard practice. In conclusion, the course will discuss where to get started and the critical need for a disaster recovery and Incident response plan. The course will provide essential information to the school business officials so they can communicate and verify the basic essentials of cybersecurity actions their districts should engage in, next level requirements, and how to get started on a cybersecurity roadmap. This information and subsequent actions are necessary to protect district and student data and position the district for their cyber liability renewal. Understanding the basic and future cybersecurity actions districts need to take to protect student and district data is essential to a School Business Official effectively budgeting for these items and positioning the district to obtain cybersecurity insurance.</p>
<p>Cyber Liability Coverage VS Cyber Crime Coverage- Who's on First?</p> <p>Thomas Strup, Executive Director, Schools of Ohio Risk Sharing Authority (SORSA)</p>	<p>This course will cover an overview of the differences between cyber liability and cyber-crime coverages and the current market conditions of both lines of insurance products. The course will provide essential information about insurance coverage and why it is important to have both cyber liability and cyber-crime insurance coverage. Understanding the basics of and differences between cyber liability and cyber crime coverage is very important for every school business official. Proper insurance coverage can alleviate stress and help mitigate the potential of a financially crippling event.</p>
<p>Capital Financing – Levy Campaigns: Practical Guidance After House Bill 140</p> <p>Catherine M. Swartz, Of Counsel, Bricker & Eckler</p>	<p>The course will provide guidance on bond and levy campaigning with cautions about impermissible communications and use of government resources. This session will provide information about current bond and levy campaign requirements and guidelines.</p>
<p>Cyber Security for Your Organization</p> <p>J. William Rivers, Special Agent in Charge, Federal Bureau of Investigation, Adam Lawson, Supervisory Special Agent - Cyber Squad, Federal Bureau of Investigation</p>	<p>Representatives from the FBI Cincinnati field office will present the FBI's perspective on cyber threats impacting public and private industry. Topics discussed will include the impact and losses due to cyber-crime, US Government roles and responsibilities during a cyber incident, the evolving cyber threat landscape, most successful initial intrusion vectors impacting victims, and cyber threat actor tactics and behaviors reported to the FBI. Additionally, the presentation will cover what to expect from the FBI during an incident.</p>
